

### Enterprise Visibility Solution for Continuous Controls Monitoring

Infogix Insight provides real-time visibility into the results of all information controls across your enterprise. This dashboard solution enables you to review the integrity of your information and make informed and timely decisions by quickly spotting errors.

Infogix Insight allows you to:

- Monitor and audit the operation and results of your automated information controls.
- Customize views to match the needs of users.
- Quantify how information errors affect a process, department, or business unit.
- Streamline your audits.

#### Proven Benefits

Infogix Insight derives its name from its ability to provide you insight into the automated information controls deployed across your enterprise.

With Infogix Insight, you can:

- Customize dashboard views of the controls environment across the enterprise.
- Display customized views of the information controls across enterprise systems.
- Centralize compliance information and documentation associated with specific control initiatives.
- Enable business executives, IT users, and auditors to drill down from aggregate status to controls execution history, and view control reports.

#### The Information

##### Integrity Experts™

At Infogix, we have over 25 years of Information Integrity® expertise. Many of the world's leading corporations depend on us. In fact, many have mandated Infogix Controls as the standard. Unlike other available options, Infogix Controls apply to all business processes across your enterprise to ensure that all of your information is accurate, consistent, and reliable.

*“Gain Insight into your enterprise-wide Information Integrity with Infogix Insight™”*

### Key Features

Infogix Insight provides a number of key features.

### Customize the Presentation of Information

- Obtain an “at-a-glance” view of your Infogix Controls.
- View control results and information relevant to your needs.

### View Real-Time Results with Drill-Down Capability

- Be informed of information errors as soon as they are detected.
- Decrease the amount of time it takes to determine and resolve information errors.

- Increase the value of information by providing visibility that leads to better decisions and increased business performance.
- View control results at any level of detail.

### Streamline Compliance

- Streamline audits and compliance reviews by providing user-friendly views of control results.
- Reduce compliance costs by centralizing control results, profiles, actions taken, and compliance related documentation.

### Auto-Discover Controls and Auto-Load Reports

- Minimize administrative efforts through auto-discovery of newly added controls.
- Improve overall performance by providing the ability to quickly pinpoint cause for errors through real-time report viewing.

### Easy-to-Use Notes, Contacts, and Attachments

- Ensure accountability by delivering proof of controls performance noting actions taken in error situations.
- Increase operational efficiency by collecting all information pertaining to control executions, ownership, and actions taken in a centralized location.

### Reporting, Trending, and Analysis Capabilities

- Make better business decisions by providing the ability to track changes in information over time and identify persistent error patterns.
- Quantify potential risks and consequences of errors.
- Understand and communicate control results in user-friendly formats.
